

04/26/2018 – SPIROMICS I Sample Preservation Criteria

SPUTUM

NUC + CYT < 3

Note: NUC and CYT are actually identical and their names were just different to inform their intended use which is no longer a concern.

BLOOD

PL100 < 3

PLLT < 5

PLYT < 5

Serum (SE) < 10

URINE

Preserved Urine < 3

Urine < 3

BRONCH

BWSUP < 3

BLSUP < 3

In all cases, once the quantity of aliquots in storage reaches the cut offs listed above, special permission must be granted by the Biomarker Working Group and the Steering Committee before the pull list can be created.
